what's going on in s.c. hospitals?

- Unprecedented levels of collaboration and knowledge sharing within and across hospitals
- Documented improvements in quality and safety indicators across the state
- Expanded focus on grassroots advocacy
- Increasing transparency and open communication
- Greater expectation for hospital leadership
the next phase of re-engineering

- **Re-engineering**: the process of building high-performing health systems and creating an environment in which they can be successful

- **Health care climate demands change**
  - Reform
  - Legislative Realities
  - Trends
methodology for improvement

- Creation of steering committee
- Adoption of Triple Aim Platform
- Committee Workgroups
  - Leadership, Best Practice and Data
- Targeted Areas of Improvement
  - Inconsistent Evidence-Based Care, High Cost of Care and Episodic Care Delivery
s.c. triple aim platform
a3 model for success

1. Reason for Action
2. “As Is”
3. Desired State
4. Gap Analysis
5. Solution Approach
6. Rapid Experiments
7. Completion Plan
8. Confirmed State
